

Valo Intranet Proof of Concept

Your Intranet is the front door of your digital workplace.

However, people find it hard to find anything from their corporate systems; content is out-dated; search isn't working; user experience is poor; and the Intranet cannot be used on a mobile.

**Sound familiar?
It doesn't have to be like that.**

Fast and efficient delivery

Your personalised Intranet built in as little as one week.

Many web parts and features out of the box.

Communicate and collaborate

Powerful search connects you to content and colleagues.

Build company culture and increase communications across teams.

An Intranet in your pocket

Mobile ready out of the box.

Native app to keep your teams connected on the go.

Not sure whether Valo is right for you?

Talk to us about our Five Step Proof of Concept

We want to make sure Valo is the right fit for you. Using a free Valo trial licence, we will create a personalised Proof of Concept intranet which can be used by your organisation for 30 days. During this time, you can test the functionality that comes out of the box with Valo, increase the understanding and awareness of the benefits of an intranet within your organisation, and gather feedback to feed into the development of your live intranet.

Step One: Kick Off

Our consultant will spend the day with you to understand your aims and objectives for your intranet, including leading a workshop with project stakeholders.

Step Two: Build

We will install and lightly brand your Valo PoC environment, which will include some of the key features that have been discussed in the workshop.

Step Three: Handover

We will talk you through your PoC environment and provide some guidance on making the most of your 30 day PoC. We'll also share feedback documents for your stakeholders to complete during the PoC.

Step Four: Catch Up

Halfway through your 30 day PoC, your project team will have a scheduled session with your Pythagoras consultant and Account Manager. This is a great opportunity to ask any questions that have arisen and for us to provide further advice on making the most of the PoC.

Step Five: Next Steps

At the end of your PoC we will use the feedback you've gathered to put together an outcomes report that you can use as part of a business case or roll out plan. Your consultant and Account Manager will also talk to your team about your preferred next steps for achieving your live intranet.

Our team will be on hand to answer questions and provide advice both during your 30 day trial, and subsequently for purchasing your licence and delivering your intranet.

Your Intranet Journey with Pythagoras

One of our Business Development Executives will discuss with you how Valo can work for your organisation.

We will either launch your project, or start with a PoC engagement.

If you opt for a PoC, your Account Manager will discuss what to expect and how to prepare for this engagement.

Once our skilled SharePoint consultants will complete the 5 step PoC as outlined.

Your PoC environment will be available for your organisation to use for 30 days.

Your Account Manager will be on hand to answer any questions throughout the PoC, and you will have a scheduled checkpoint with your consultant too.

Your Account Manager and consultant will discuss the best next steps to prepare for a full intranet roll out.

You can purchase your Valo licences with Pythagoras.

We will carry out your intranet build based on feedback gathered in your PoC.
